Third Party Risk, *Expertly Managed*

Complete visibility into your vendor ecosystem — from onboarding through continuous monitoring — so your team can focus on what matters most.

100%	Weekly/Monthly	5x	48h
Vendor coverage	assessment and monitoring	Faster risk identification	Average time to insight

THE THREAT IS ACCELERATING

Protecting your business by protecting your vendors

Organizations today rely on an expanding ecosystem of vendors, SaaS platforms, and service providers. While these partnerships accelerate innovation, they also introduce significant cyber and operational risk. **A single high-risk vendor with weak controls can become the entry point for a major breach** — and the consequences fall on you, not them.

35.5%

of all data breaches in 2024 originated from third-party compromises

WHY IT MATTERS

Five reasons to act now

Visibility into high-risk partners

Gain a clear, prioritized view of which vendors carry the greatest cyber risk — no more blind spots in your third-party ecosystem.

Aggregated cyber risk across your supply chain

Consolidate risk signals from across your entire vendor portfolio into a single, unified view connecting internal exposure to supply chain vulnerabilities.

Free your team for operational priorities

Offload vendor assessments, scoring, and follow-ups to our managed service — giving your security team back the time to focus on internal operations.

Proactive breach intelligence

Receive early-warning signals and threat intelligence that identify potential vendor breaches before they cascade into your environment.

Third-party breach impact on your compliance posture

Understand exactly how a breach at any vendor translates to your internal compliance obligations — mapping third-party incidents to your regulatory and framework requirements in real time.

TakTik Technologies × FortifyData

Powered by partnership

TakTik Technologies has partnered with FortifyData to deliver a comprehensive Third-Party Risk Management solution tailored for small and mid-size businesses — providing an enterprise-level view of your overall cyber risk posture by aggregating risk profiles and security scores across all vendors, suppliers, and partners.

Unified risk score

Third-party insights feed directly into your organization's total risk score for a single, accurate picture of exposure.

Enterprise-grade for SMBs

Full aggregation of vendor risk profiles and security scores, without the overhead of an in-house program.

Compliance alignment

The platform maps third-party risks to your compliance requirements, keeping you aligned with regulatory standards.

Proactive management

Vendor risk is managed continuously, not reactively, so issues are addressed before they affect your business.

OUR PHILOSOPHY

Your vendors are an extension of your attack surface. We manage that risk, end to end.

THE FULL-LIFECYCLE SERVICE MODEL

Nine integrated capabilities

Organized across three phases — from initial setup through ongoing operations to program optimization — every capability feeds a single, continuously updated view of your vendor risk.

1 Foundation & onboarding

WEEKS 1–2

Setup risk management portal

CORE

Configure your organization's risk profile from day one — parameters, appetite, and scoring framework.

Import and classify vendors

CORE

Ingest your vendor list, enrich with metadata, and assign criticality tiers for targeted treatment.

2 Ongoing operations

CONTINUOUS

Automated assessments & external scans

CORE

Questionnaires, control assessments, and non-intrusive scans — reducing manual effort by 80%+.

Vendor scoring & baseline reporting

CORE

Calibrated risk scores and posture reports for every vendor — instant, defensible snapshots.

Continuous vendor monitoring

CORE

Track posture changes — threat intel, dark web signals, technology footprint shifts.

Remediation & fix validation

CORE

Track findings through resolution and independently validate that controls were properly implemented.

Compliance & audit support

CORE

Map findings to SOC 2, ISO 27001, NIST, DORA, and more — audit-ready evidence on demand.

3 Optimize & extend

QUARTERLY / AS NEEDED

Program optimization through QBRs

ADVISORY

Quarterly reviews with your dedicated team to analyze trends and align the program to your priorities.

Advanced & optional services

OPTIONAL

On-demand pen testing, executive briefings, M&A vendor diligence sprints, and GRC integrations.

SUMMARY

Your third-party risk, completely covered

Third-party risk is one of the fastest-growing sources of cyber exposure for businesses of every size. TakTik's TPRMS gives your organization continuous, expert-driven oversight of every vendor relationship — and here's what that means for your team, day to day:

One team, zero added headcount

From portal setup to quarterly reviews, we run the program so your internal team doesn't have to staff it.

Enterprise insight, SMB cost

One unified risk score across every vendor — visibility previously reserved for large enterprises.

Catch it before it costs you

Continuous monitoring and early breach intelligence mean you act before incidents occur, not after.

Audit day, any day

Findings mapped to your frameworks, with evidence packages ready whenever you need them.

Nothing falls through the cracks

We track every finding through to resolution and independently validate the fix.

Backed by FortifyData

Purpose-built third-party risk technology, delivered and managed by TakTik Technologies experts.
